

Barcelona, 2021

Our new Godó collection lives up to its rather regal name. It has a noble character thanks to the use to fine wood and rich, luxurious upholstery. Godó stands out as the most refined collection in the Lagranja design furniture catalogue, for its inherent elegance and strong presence.

The Godó collection is designed for spacious waiting rooms, hotel lobbies, and outdoor and indoor spaces where time is on your side.

The generous form and 360° visual appeal of the armchair and divan is achieved with precisely curved and geometrically arranged wooden slats that cradle your back and provide comfort, complemented with a smart pouf for perching or putting your feet up.

Crafted in beech for interior use or hardy iroko for the exterior, Godó features a deep upholstered seat and cushioned back that can be rearranged for to body contours and removed for easy cleaning.
